"The Promise and Miracles of Science in the Divine Plan" presented by Dr. Theresa Deisher

Dr. Theresa Deisher is the founder of Sound Choice Pharmaceutical Institute and the CEO of AVM (Ave Maria) Biotechnology. Both companies have a mission to end the use of aborted babies in biomedical research. Based in Seattle, she has 23 patents in her name. She has worked diligently on developing adult stem cell technologies that are equally or more effective than fetal or embryonic stem cells, eliminating the need for human exploitation in research.

Dr. Deisher, with her expertise in the field, assisted the Center for Medical Progress in its preparation to infiltrate Planned Parenthood to expose its practice of harvesting aborted baby parts for sale. She helped prepare David Daleiden (and his cohorts) as biomedical representatives to conduct this undercover investigation.
